# 1. PRESENTATION

This salt cartridge is a reference calibrated at 75% relative humidity and can be used to calibrate the thermo-hygrometers in the field.

## 2. USER INSTRUCTIONS

- 1 Remove the protective cover from the product's temperature and hygrometric sensors.
- 2 If necessary, position the seal ring corresponding to the diameter of the sensor as shown in Figure 1.
- 3 Place the humidity standard in order to secure airtightness.
- 4 Set the product to «%RH».
- 5 Wait until the measurement is stabilized. The thermo-hygrometer should display a humidity value close the value indicated on the salt cartridge (the actual value depends on the ambient temperature).
- 6 If the result of the measurement is not in the instrument's specified accuracy range, please contact our accredited laboratories (list on request) or the Chauvin Arnoux subsidiary or Agent in your country.
- 7 Close carefully the cartridge after use.
- 8 The life of the cartridge salt is one year after opening.
